MS-820: Available Codes

Laser Barcode Scanner

The MS-820 is a compact single-line scanner optimized for reading high density codes. Its small size, robust reading and industrial features have established the MS-820 as the standard barcode scanner on the assembly lines of many large manufacturers.

The MS-820's IP54 enclosure rating makes it ideal for applications such as conveyors, assembly lines or integration within machinery.

Reliability

The MS-820 offers time-tested reading performance and design. Microscan's unmatched customer support is available to assist with custom configurations.

Read Performance

The MS-820 optics allow successful reading of codes out to 30" (762 mm), at a 60° scan angle and up to a 10" (254 mm) beam width.

Real-time Controls

Discrete input/output connections consist of three optoisolated programmable outputs, one trigger input, and one programmable input.

Ease of Use

A fully programmable feature set allows users of all experience levels to quickly and easily configure the scanner.

Flexibility

The compact size of the MS-820 allows flexible positioning for a variety of applications. Custom software options are available to further adapt the scanner to the needs of the user.

Reverse Video

This feature allows users the flexibility to read light-on-dark or dark-on-light bar codes.

Application Examples

- Any industrial environment from light to heavy duty
- Conveyor lines
- Embedded within machinery
